

"Where is it now?"
asks Thandi.

Jongi comes to look.
He can't see anything
inside the shell.

Maybe it was eaten!
Or it's dead and rotting!

The insects are eating the things
that are rotting.

Untangle the earthworms
to see which one has found something
that **won't rot** and
it **can't eat**.

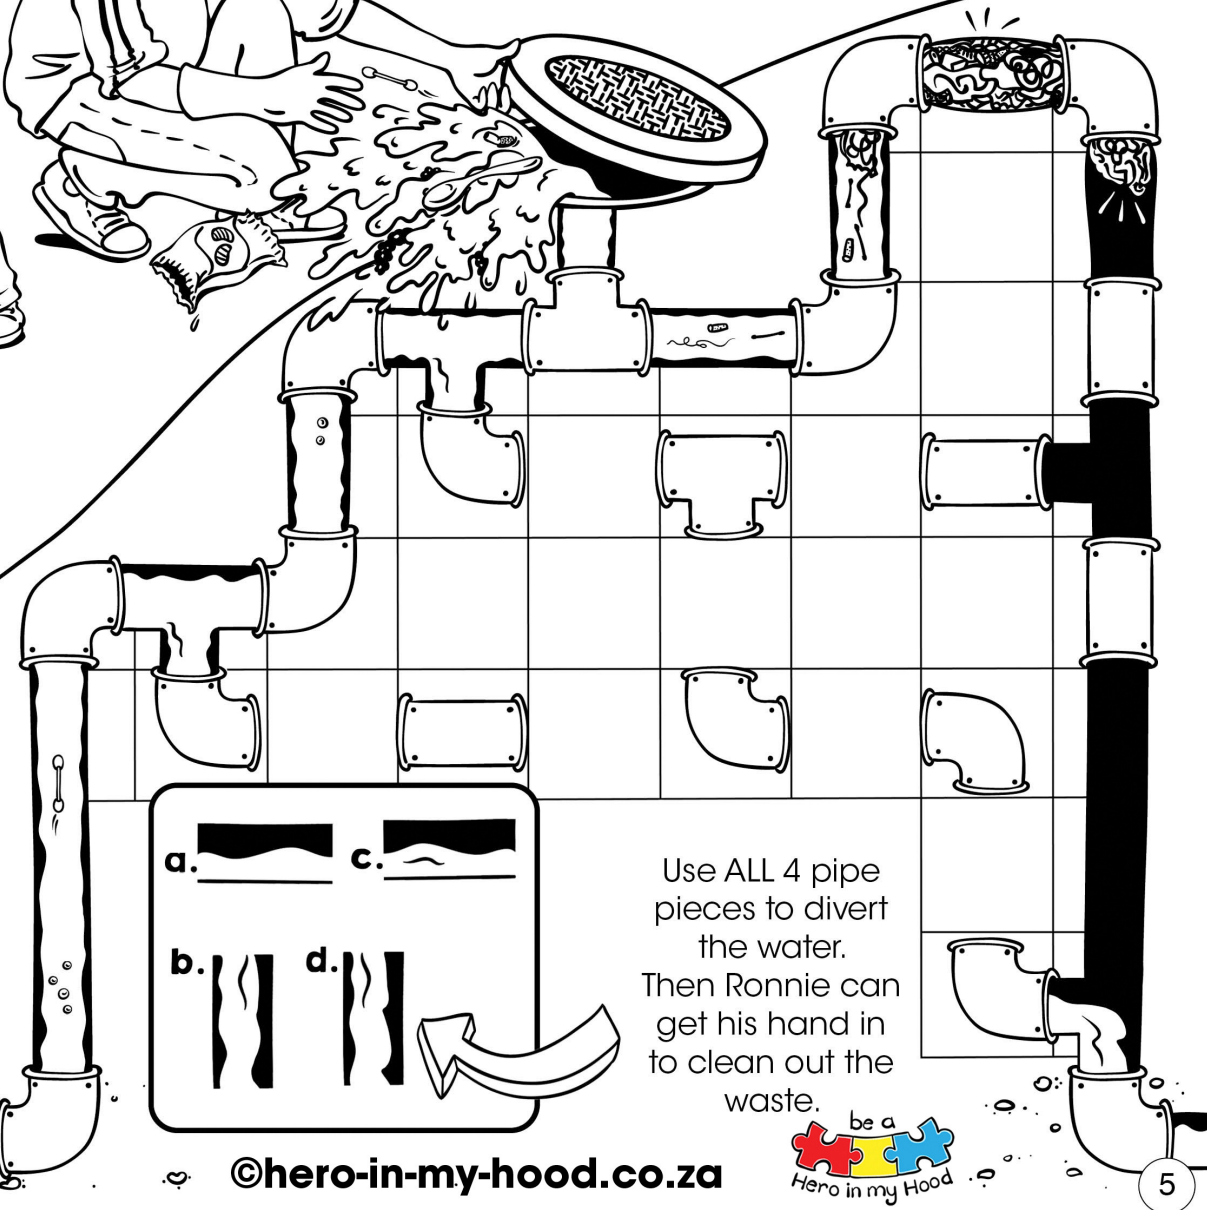

Write the
letter of that
earthworm
in this square.

Oh ugh, yuhk!

The drain is blocked with plastic.

Let's help Ronnie clear it.

Use ALL 4 pipe
pieces to divert
the water.
Then Ronnie can
get his hand in
to clean out the
waste.
